

**Product Name:** PARKIPEX 0.25 mg Tablet

**Active Substances:** Pramipexole

**Form:** 100 Tablets

**Therapeutic indications:** PARKIPEX is indicated for the treatment of signs and symptoms of idiopathic Parkinson's disease in adults. It can be used alone (without concomitant levodopa) or in combination with levodopa, when the effect of levodopa begins to diminish towards the late stages of the course of the disease or when fluctuations in the therapeutic effect occur because it becomes variable (end of dose or tidal fluctuations).

PARKIPEX® is indicated to be used in the symptomatic treatment of moderate to severe idiopathic restless leg syndrome (RLS) in adults in doses up to 0.75 mg (salt) (0.54 mg base).

**Posology and method of administration:** Parkinson's Disease: The daily dose is administered in three equal parts 3 times a day. 0.375 mg - 4.5 mg /daily. RLS: The recommended starting dose of PARKIPEX is 0.125 mg salt taken 2-3 hours before bedtime, once a day. 0.125 mg - 0.75 mg
